USING M.2 SLOT WITH NEW SSD

While using the **NEW M.2 2230 SSD** , its important to note that you need to format the disk for the **first time**. Not doing so , you might face difficulty in accessing the disk on your iPhones , Android Phones and other devices ..

So , to make things easier for you , we have mentioned a **STEP-BY-STEP** process for the same

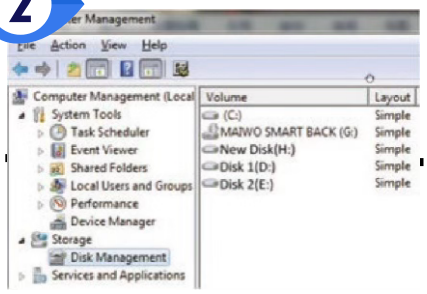

Firstly , Insert the **SSD in Magneto** and then connect the Magneto to a Windows Laptop using the Type - C **INPUT PORT**

1

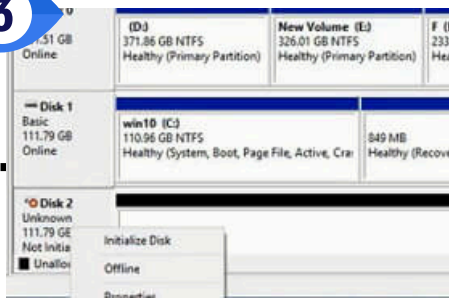

RIGHT CLICK on My Computer
Click Manage

2

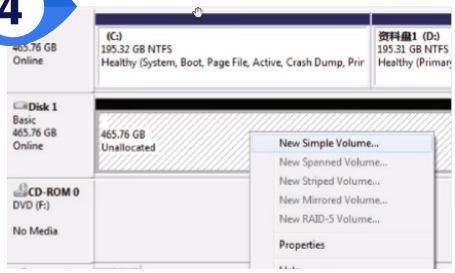

Select **Disk Management**
to find the new disk with tag
“UNALLOCATED”

3

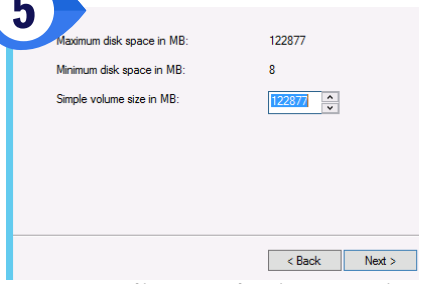

Right click on your disk and
Click Initialize.
(If you don’t find this option , skip to Step 4)

4

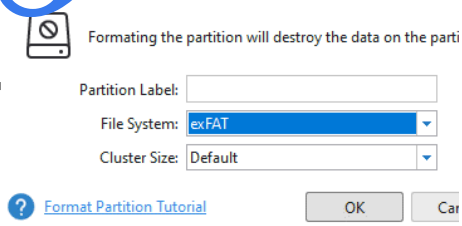

Right click the “Disk 1”,
then click **“New Simple Volume”**

5

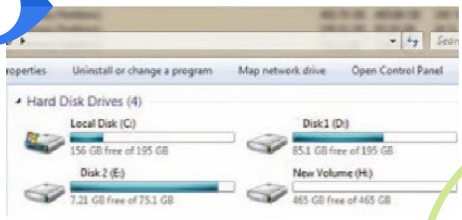

According to the instruction,
choose the size of partition,
then click **“Next”** to finish

6

IMPORTANT -
Choose **ExFAT** File System

7

Now you can find the **NEW SSD**
in “My Computer”,
it is ready to use.

completed

Now the Magento SSD is ready to be used on all devices including iPhone and Android.

If still facing any difficulty ,
